

Government Contract Guide

The Contracts You Need to Advance Your Mission

For over 25 years, GTSI has been government's premier provider of IT hardware and software, professional services, and turnkey infrastructure technology solutions. A deep knowledge of federal, state, and local government technology environments, policies, and business objectives is matched by GTSI's extensive portfolio of contract vehicles and expertise in government purchasing requirements.

Value of GTSI Program and Contract Management

GTSI's portfolio of contracts includes government-wide acquisition contracts (GWACs), multiple award schedules (MAS), multi-agency contracts (MACs), and blanket purchase agreements (BPAs). Federal, state, and local government agencies can address their technology needs by acquiring advanced COTS technology, engineering and project management services, and IT infrastructure solutions through these contract vehicles.

GTSI's team of program and contract managers helps customers evaluate business and technical requirements, select the best contract vehicle, and proposes the optimal solution within the scope of available contracts. These experienced managers in government contracting lead the programs post-award, balance ongoing customer requirements, and ensure efficient and professional delivery of the services and products associated with the program.

Turnkey Solutions with Technology Lifecycle Management

GTSI's Technology Lifecycle Management methodology proactively considers and addresses each stage of technology to prolong the lifecycle, optimize performance, and lower total cost of ownership. Through this approach, agencies can anticipate their budgeting requirements and put effective cost-recovery strategies in place.

Access Via Custom-designed Portals

GTSI's custom-designed portals make it easy for agencies to access the technology they need. Through a dedicated contract portal, GTSI provides technology and procurement solutions that support customer operational and acquisition requirements.

Leveraging Technology with Professional and Financial Services

Careful planning and project management, along with proven processes, enable GTSI to complete agencies' IT projects on time, within scope, and on budget. To enhance their IT infrastructures' performance and realize the full benefit of their technology investments, agencies can access GTSI's comprehensive range of services, which includes:

- Financial Services
- e-Business
- Program Management
- Project Management
- Integration Services
- Engineering Services
- Education
- Staff Augmentation
- Support Services

GTSI offers comprehensive professional and financial services for turnkey IT infrastructure solutions. GTSI certified engineers and project managers, with hundreds of certifications, support agencies in the following technology areas:

- Data Center
- Networking
- Client
- Security
- IT Service Management

GTSI Corp. is the first information technology solutions provider offering a Technology Lifecycle Management (TLM) approach to IT infrastructure solutions delivered through industry-leading professional and financial services. GTSI employs a proactive, strategic methodology that streamlines technology lifecycle management, from initial assessment to acquisition, implementation, refresh, and disposal. TLM allows government agencies to implement solutions of national and local significance quickly and cost-effectively. GTSI's certified engineers and project managers leverage strategic partnerships with technology innovators. These experts use proven, repeatable processes to design, deploy, manage, and support simple to complex solutions, to meet governments' current and future requirements and business objectives. GTSI is headquartered in Northern Virginia, outside of Washington, D.C.
