

## ITES 2H Contract

The Information Technology Enterprise Solutions 2-Hardware (ITES 2H) contract, managed by the Army Small Computer Program, is the Army's primary source for a full range of commercial off-the-shelf (COTS) enterprise technology hardware and software, and related services.

### **GTSI brings proven value to government customers**

#### **Solutions. Services. People.**

These core strengths are the reason GTSI has been government's most reliable technology provider for nearly 25 years. The GTSI team knows the terrain; anticipates every possibility; and understands business, technical, and agency objectives. More than anything, GTSI responds quickly, efficiently, and reliably to put our customers' mission first.

GTSI solutions and capabilities help agencies reach program goals faster and at a lower overall cost. Scalable and highly responsive, our solutions are built around the technologies government needs most—servers and storage, security, mobility, and network capabilities.

Our innovative Technology Lifecycle Management (TLM) approach enables government agencies to proactively manage their enterprise infrastructure from inception and implementation through refresh and end of life. GTSI brings an extensive suite of professional and financial services that enable agencies to align acquisition strategy with business objectives and finance IT infrastructure solutions over time.

From assessment to technology acquisition, implementation, and support, GTSI partners with our customers to deliver the appropriate hardware, software, and services. Supported by teams of certified engineers and project managers who employ Earned Value Management (EVM) standards and proven processes throughout each phase of a project, GTSI offers a range of solutions that enable agencies to realize the full benefit of their IT infrastructures.

GTSI's Program Management Office provides a framework for all of GTSI's value-added services, helping our customers leverage available contract vehicles to obtain the solutions and related services they need to accomplish their goals.

### **GTSI products and services on ITES 2H**

Under ITES 2H, Federal agencies can purchase and lease industry-leading, innovative COTS hardware and software with related support, engineering, and integration services at competitive prices.

- Servers UNIX Platforms
- Servers MS Windows Intel/AMD
- Storage systems
- Workstations (64- and 32-bit)
- Thin clients
- Desktops, laptops and notebooks
- Networking systems
- Operating systems and commercial software applications
- Network printers and scanners
- Power devices and UPS
- Displays and monitors
- Technology insertion, including biometrics, embedded encryption, and body wearable computers and displays
- Video teleconferencing, VoIP and Unified Communications solutions

With more than 100 industry certifications, GTSI's experienced teams of engineers and project managers deliver product-related services that include:

- On-site assessments
- Proof of concept and engineering implementation
- System configuration and integration
- Image loading
- Support services—warranty maintenance and help desk services
- Data migration
- Asset management—RFID, UID
- Technology lifecycle management

### **Contract details**

- Firm fixed price ID/IQ contract #W91QUZ-07-D-0008
- GTSI is a small business awardee
- Three-year contract, with two one-year option periods
- Open to all Federal agencies
- No contract fees
- Decentralized contracting
- Manufacturer warranty with upgrade options
- Expedient delivery to CONUS and OCONUS locations
- 24-hour customer support; 365 days per year

GTSI's IT infrastructure solutions are comprised of hardware, software, and services that meet the technical needs and business requirements of our Army and DoD customers.

GTSI Corp. is the first information technology solutions provider offering a Technology Lifecycle Management (TLM) approach to IT infrastructure solutions delivered through industry-leading professional and financial services. GTSI employs a proactive, strategic methodology that streamlines technology lifecycle management, from initial assessment to acquisition, implementation, refresh, and disposal. TLM allows government agencies to implement solutions of national and local significance quickly and cost-effectively. GTSI's certified engineers and project managers leverage strategic partnerships with technology innovators. These experts use proven, repeatable processes to design, deploy, manage, and support simple to complex solutions, to meet governments' current and future requirements and business objectives. GTSI is headquartered in Northern Virginia, outside of Washington, D.C.
