

# GTSI Enterprise Education Services

**GTSI Enterprise Education Services enable government agencies to meet human capital initiatives and build a highly knowledgeable workforce.**

GTSI offers education expertise in a wide range of information technology and business disciplines. Certified instructors, with appropriate clearances, deliver technology training and college-accredited courses through multiple affordable and convenient learning paths. GTSI can also customize education programs to meet specific learning requirements.

Pairing GTSI Enterprise Education Services with the acquisition of hardware and software, comprehensive solutions, or agency-specific configurations accelerates employees' learning curves, enabling them to confidently implement, operate, and maintain technology. In addition, GTSI offers a variety of classes to upgrade employees' skills on legacy equipment to optimize its performance and extend the value of the existing IT infrastructure.

GTSI can conduct a skills assessment of an agency's training needs, identifying gaps between employees' current skill levels and the proficiency required to meet government performance and service delivery mandates. Along with the development of an IT curriculum map that addresses the agency's training needs, GTSI provides education

programs that complement individual employee career paths.

### The Value of GTSI Enterprise Education Services

- Accelerated learning curve on newly acquired technology solutions, configurations, and hardware and software
- Improved proficiency on legacy equipment to optimize functionality
- Individualized learning paths based on skills assessment
- OEM, professional, and industry certification training
- Skilled workforce development through college-accredited courses and technical, professional, and job-specific training
- A single resource for classroom and Web-based training in multiple disciplines
- Flex-Ed credits for training on an as-needed basis with one purchase order
- Targeted courseware for each stage of the technology lifecycle
- Customized training to augment existing program or for new initiatives
- Consistent learning path aligns to agencies' human capital initiatives
- Access to training centers across the country

## **GTSI Education Program Formats**

GTSI Enterprise Education Services provide government with a non-biased resource for educating agency workforces. Customers may acquire training and courseware as a stand-alone program or as an augmentation of current education programs, or customize the programs to agency specific needs.

GTSI delivers courses in a classroom setting at training facilities in several locations or at the customer's site. In addition, training is available in a variety of interactive, Web-based formats.

### **Instructor led**

Certified technical experts conduct lectures and labs in a classroom environment, translating advanced technologies into real-world applications. In addition to providing hands-on training that enhances technical, professional, and job-specific skills, GTSI delivers customized training at training facilities in several locations and at the customer's site.

### **Web-based e-learning**

Web-based training provides 24x7 access to accredited classes and the latest courseware. Public sector employees can participate in GTSI's technical, professional, and industry certification training programs at any time and from any location a computer is available. The advantages of Web-based e-learning include improved retention and the ability to deliver training simultaneously to an unlimited number of people, enabling an entire workforce to be brought up to speed on the latest technology in a short timeframe.

### **Custom-designed instruction**

Based on individual skills assessment, GTSI packages multiple training options into courseware that fully addresses each agency's education requirements, timeframe, budget, and training criteria. In addition, metrics are established to assess individual employee competencies and the effectiveness of the agency's education program.

## **GTSI Flex-Ed**

Because workforce education is a continuous process, GTSI developed Flex-Ed. This flexible education program allows government customers to purchase training credits in advance and then, when needed, choose any combination of courses within one year of purchase. Flex-Ed promotes the development of individualized learning paths that align to agencies' current business objectives and staffing requirements. Additionally, it provides employees the flexibility to attend training at the time and locations that best suit their schedules.

Flex-Ed also simplifies the budgeting process. With pre-purchased training funds locked in, agencies do not have to seek additional approval or funding sources each time training is requested.
